

BEILEI ZHU

FRONT-END & UX DESIGN

I am dedicated and detail-oriented Front-End Web Designer/Developer with a foundation in design principles and web development technologies. My goal is to creating user-centric, visually appealing web experiences to life. I am seeking an entry-level position to leverage skills gained from the Nashville Software School Bootcamp and a background in graphic design.

projects

FOTOFinder React-Frontend App

It's enhancing the interaction between photographers and clients. Created distinct user experiences for photographers and clients, enabling photographers to showcase portfolios, manage the appointments between clients, and clients to find photographers by zip code and photo types, and book appointments.

- Utilized real-time database integration via API calls.
- Implemented full CRUD functionality.
- Administrators have privileges for managing user accounts.

SECOND APP UX Design App

Enhancing the interaction between photographers and clients. Created distinct user experiences for photographers and clients, enabling photographers to showcase portfolios, manage the appointments between clients, and clients to find photographers by zip code and photo types, and book appointments.

- Utilized real-time database integration via API calls.
- Implemented full CRUD functionality.
- Administrators have privileges for managing user accounts.
